

How Organizations Evolve and Migrate OpenText to the Cloud with Guidance and Direction From Auritas

"Auritas brought in our migration project on-time and on-budget, with high internal customer satisfaction. Going forward we project over 50% savings of what we were paying in our previous infrastructure"

-CIO, Global Consumer Products Company

Overview & Challenges

Organizations have been benefiting from the functionality of the leading Enterprise Content Management (ECM) solution for SAP, OpenText, for many years. To align with long-term strategies, deliver critical new functionality and streamline business processes, it has become imperative for many to move their existing OpenText infrastructure to cloud for improved access and storage as well as to reduce silos and support costs.

Auritas has assisted many organizations across industries with their cloud migration exercises ranging from 2 – 45 terabytes of data from outdated storage centers to a modern cloud environment. Auritas provides expert SAP and OpenText professional consulting services to stabilize, move and consolidate data from existing OpenText systems and disparate storage centers and successfully accomplish digital transformation objectives, including:

- Stabilization of current on-premise landscapes
- Set up, configuration, maintenance, and update of the on-prem and Cloud operational environments
- Support for migration to the cloud including: new installations of ECM in current cloud infrastructure and migration of on-premise environments to the cloud

Why Auritas for Cloud Migration?

Deep domain knowledge in SAP Enterprise Data and Content Management, leveraging EIM, ILM and ECM technologies with applications like OpenText.

Demonstrable past performance to support Data Management efforts in multiple industry verticals, with SAP and OpenText teams working closely with customers and other strategic service providers to deliver successful projects.

Objective and thorough requirements definition: **Big Picture Approach.**

**SAP and OpenText
Certified Partner**

**Serving SAP Enterprise
Customers Since 2003**

**Featured Solution
Cloud Migration**

Solution Scope

- "Design and Blueprint" workshops with customer migration teams to create a roadmap for success
- Creation of OpenText Archive environments in Cloud environments
- Establish connection between SAP systems and OpenText Archive environments
- Migration of OpenText data and documents from on-premise architecture to cloud
- Migration of additional data and documents from on-premise 'silos' to the new OpenText cloud environment, enabling retirement of those related legacy systems
- Post go-live Hypercare to ensure systems are operational, monitoring was implemented and fine-tuned
- Successful testing of all functionality including Disaster Recovery
- Automation of the process of archiving (ILM) and content storage to extend ROI and results

Benefits

- ✓ Successful OpenText migration to Cloud; On budget and ahead of schedule with no user impact or issues
- ✓ Savings upwards of \$10M due to no more mandatory technology refreshes every 5 years.
- ✓ Savings in the millions related to migrating additional SAP and non-SAP document silos to the new cloud environment and retiring the related legacy systems
- ✓ OpenText data and systems are now in the cloud, readily available to all users and supported by 3rd party cloud provider
- ✓ More visible, accessible, understandable, trusted, interoperable and secure
- ✓ Improved user experience, reliability, and disaster recovery
